

Queclink is a global IoT solutions leader, designing and manufacturing smart tracking and networking devices that provide real-time visibility into mobile assets and transportation. Queclink's six key product categories help businesses worldwide streamline operations, cut costs, and drive sustainable growth.

Video Telematics

GPS tracking with video insights for driver behavior, vehicle monitoring, and incident evidence to enhance safety and streamline claims.

Asset Tracking

GNSS-powered solutions for secure, real-time monitoring of containers, trailers, and equipment, preventing theft and maximizing utilization.

Networks

High-speed, robust connectivity for secure data transfer, failover protection, Wi-Fi hotspots, and remote device management.

Micromobility

A range of IoT products & OEM services tailored for eBikes, scooters, and other light vehicles for ride analytics and security.

Custom Solutions

Tailored IoT solutions with flexible hardware, firmware, and integration options that help your business thrive.

Innovating for 17 Years

260

Device models

73M

Units shipped

170

Countries

Trusted by 4,000 clients

Telematics Service Providers

Seamless integration, global connectivity, and customizable hardware to scale telematics solutions.

Fleet Operators

Real-time tracking, driver monitoring, and predictive maintenance for improved efficiency and cost savings.

Organizations

IoT-powered insights for enhanced security and streamlined operations for enterprises, schools, and governments.
